

You have been watching a video for some time. Knowing the total video duration find out what portion of the video you have already watched.

Example

For `part = "02:20:00"` and `total = "07:00:00"` , the output should be
`videoPart(part, total) = [1, 3]` .

You have watched 1 / 3 of the whole video.

Input/Output

- **[execution time limit] 4 seconds (js)**
- **[input] string part**
A string of the following format `"hh:mm:ss"` representing the time you have been watching the video.
- **[input] string total**
A string of the following format `"hh:mm:ss"` representing the total video duration.
- **[output] array.integer**
An array of the following format `[a, b]` (where `a / b` is a [reduced fraction](#)).

[JavaScript (ES6)] Syntax Tips

```
// Prints help message to the console
// Returns a string
function helloWorld(name) {
  console.log("This prints to the console when you Run Tests");
  return "Hello, " + name;
}
```
