BACK   Swap Adjacent Words   🔶 159,154   ⌄

‹ **DESCRIPTION**   MY SOLUTIONS   LEADERBOARD   COMMENTS   README ›   RECOVERY   SCORE: 100/100

You are given a string consisting of words separated by whitespace characters, where the words consist only of Latin letters. Your task is to swap pairs of consecutive words and return the result.

Example

- For `s = "CodeFight On"` , the output should be
  `swapAdjacentWords(s) = "On CodeFight"` ;
- For `s = "How are you today guys"` , the output should be
  `swapAdjacentWords(s) = "are How today you guys"` .

Input/Output

- **[execution time limit] 4 seconds (js)**

- **[input] string s**

  A string consisting of whitespace characters (`' '`) and Latin letters. There is exactly one whitespace character between two consecutive words, and both the first and the last characters of `s` are not equal to `' '` .

  Guaranteed constraints:
  `0 ≤ s.length ≤ 100` .

- **[output] string**

  String `s` with pairs of adjacent words swapped.

[JavaScript (ES6)] Syntax Tips

```
// Prints help message to the console
// Returns a string
function helloWorld(name) {
    console.log("This prints to the console when you Run Tests");
    return "Hello, " + name;
}
```
